

Marina Vista/ Alder Grove: Visioning Meeting #2

November 1, 2014

Items/Themes Missed

(Comments below were transcribed directly from boards)

Quality Construction

Dog Park – i.e. gathering places (no more poops)

Retain heritage trees – unique

Access to high quality education

Personal growth

Complement/recognize architectural diversity of what exists

Community garden

Inclusion of churches/places of worship

Maintaining existing Schools

Maintaining some existing homes/character/feel

Spread affordability to other sites beyond two sites

Increased density and traffic, shouldn't impact existing neighborhood – move to transit corridors

Impact of bridge on traffic

Safety too focused on traffic – extend to other public institutions

Parking – less dependent on auto's – more local services

Concern increase density will impact on neighborhood

What does mixed tenure and mixed affordable look like

Principles seem lofty

How does community really work with law enforcement?

Impact of change on existing school enough slots?

What does increase of density really mean – no PH that is what is currently here

Traffic calming in existing neighborhood

Water savings – sustainability

Quality of education, continuity of school

Library in community – in school

Create strong connections w/in community

Networks for streets/sidewalks need to improve beyond community

Lack of access to high quality food

Increase access to shopping opportunity on W. Broadway

Disparity between school performance – education options – charter schools

More opportunity for early childhood education

Huge need for increased public space for use by civic, religious, other groups

If green, why not just rehab existing?

How is interconnectedness achieved? School events track and field events

Physical design them stronger - #2

Hard to have connection without safety first

Density – broad concern and no discussion in process to date (traffic, safety, low income housing) off site

Police substation added back

Principles are not what we really said

Increase density on Broadway – move O’Neil Field down here
Traffic “plan will address traffic impacts”
Helping people to transition out of PH
